

AltiusWHS Compliance Management Software

AltiusWHS makes it simple for organisations, of all sizes across all industries, to comply with their Work Health and Safety obligations. The cloud-based software is designed to manage and minimise safety risks to your employees.

At Altius Group we work with organisations to integrate AltiusWHS Compliance Management Software into workplaces, providing unique solutions to address people and workplace related risk.

Responsive design means AltiusWHS Compliance Management Software is able to be accessed easily via laptop, desktop, tablet or mobile.

AltiusWHS keeps you one step ahead for all things WHS through email notifications, an easy-overview dashboard and social media integration. The Permissions Management feature ensures you're able to control what users can see and do within the system while storing all your important health and safety records in one place, securely.

How AltiusWHS Benefits Employers

It saves money: Capturing your safety activity keeps your workplace productive and workers compensation costs down.

It ensures legal compliance: As it is aligned with the latest legislative framework.

It saves time: With all the tools you need to capture safety activity and monitor your progress simply you'll spend less time tracking how your workplace safety is going.

And provides peace of mind: By making it easy to capture hazards, actions and incidents on any device and log your response ... and providing resources backed by up to date evidence and legislation.

AltiusWHS Compliance Management Software + Altius Group Support

- Our Outsourced WHS Consultants help you to **ensure compliance** and drive your WHS systems.
 - Altius Group Engaged Return to Work Coordinators provide **first-response** to workplace injuries in 'real-time'.
 - Customised notifications for workplace incidents to connect to your **support network** - this may include the rehabilitation provider, RTWC or insurance broker.
 - Connect employees to your Employee Assistance Program (EAP) provider
 - Data collection and analysis to provide **strategic workplace solutions** to address WHS and workers compensation trends.
- via AltiusWHS software, including Critical Incident Response to connect to **expertise during a crisis.**

The Modules

AltiusWHS modules incorporate all the online tools you need for:

Incident Notification and Investigation

Through reporting forms and auto-generated email notifications landing directly in key stakeholder inboxes.

Safety Planning and Compliance

Establish and allocate compliance tasks unique to your workplace and monitor their progress via the dashboard.

Customised Inspections and Audits

With functions to create, schedule and ensure inspections are completed.

Monitoring Hazards and Corrective Actions

Input, track and monitor such actions and improvements, complete with reminders.

Human Resources Management

Store contact and training details, workers compensation documents and performance management information.

Document Storage and Version Control

Including health and safety manuals and your organisations' internal policies and procedures.

Chemical Management

Keep Safety Data Sheets (SDSs) up-to-date and available to workers. Upload, update and store important hazardous chemical information in the cloud for easy access.

Training

Upload relevant training documentation and certifications, and track expiry dates to know your people are properly trained.

Reporting

Oversee, track and report on the progress of your safety management system, in real time! Harness the power of your data, identifying trends and capturing insights to ultimately improve your safety performance.

Covering your Insurance Needs

Manage insurances, registrations, licences and certificates with useful reminders as expiry dates approach.

Contractor Management

Using the functionality of our records management modules.

User-Friendly Features Make Compliance Management Simple

- Everything is stored in the cloud for easy access, visible via an easy-overview dashboard.
- Responsive design means the system self-configures to suit any device.
- Build the system to best suit your needs.
- Industry-leading security systems safekeep your documentation.
- Email notifications and reminders keep your safety plans on track.
- With added features including a virtual filebox, language translation, time zone management and social media integration, AltiusWHS has you covered.
